Workshop: “Collaborative network for rethinking money in society: an educators’ initiative”.

This workshop will introduce a new collaborative initiative designed for educators interested in rethinking how we teach the evolving concept of money. Based on the course “Re-Imagining Money for a Sustainable Future,” now part of the “Economy and Society” bachelor program at Lund University (Sweden) as well as of the “AI and Business Administration” at ESADE (Barcelona), the initiative invites participants to join a global network to share

course content, adapt content to diverse contexts, co-develop teaching materials, and co-author teaching cases on various kinds of moneys. The workshop will explore how to organize such an educational collaboration. It invites workshop participants to an open dialogue with the goal of building a vibrant community of educators dedicated to transforming business and economics education on 'money in society'.

activists' day at Millepiani Coworking (Via Nicolo Odero, 13, 00154 Roma RM)

On Activist Day we will try to put the theory into practice: if money is a tool for collaboration, shouldn't money experts be the best collaborators on the planet?

Matthew Slater will be the day's coordinator. Matthew has designed some recent “Collaborative Finance” events and will design this final day to create long-term forms of cooperation through social processes. Before you get to the day, imagine how your colleagues could help.

For any information please contact Matthew at this email: matslats@fastmail.com
